

Free performance monitoring and reporting tool for servers

LPAR2RRD tool provides end-to-end views of your virtualized server environment and can save you significant money in operation monitoring. It can also generate policy-based alerts, and provide capacity reports and forecasting data. The tool collects performance data and visualizes recent, historical and future trends in utilization of your virtual environment. All collected data are stored in LPAR2RRD for further usage as graphs, reports, alerts, etc.

Supported platforms

- ▶ IBM Power Systems
- ▶ VMware
- ▶ Oracle Solaris
- ▶ Microsoft Windows Server and Hyper-V
- ▶ XenServer/Citrix Hypervisor
- ▶ KVM/oVirt/RHV
- ▶ Hitachi Compute Blade
- ▶ Linux

Optionally, you can buy support to get:

- ▶ SLA: next business day response time for critical issues.
- ▶ Enterprise Edition with enhanced features.
- ▶ Report automation.
- ▶ Regular health checks.
- ▶ Priority in implementation of new features based on your request.
- ▶ Customized report options based on your requests.
